

CHAPTER 151: FLOOD DAMAGE PREVENTION

Section

General Provisions

- 151.01 Statutory authorization
- 151.02 Findings of fact
- 151.03 Purpose
- 151.04 Methods of reducing flood losses
- 151.05 Definitions
- 151.06 Applicability of provisions
- 151.07 Basis for establishing areas of special flood hazard
- 151.08 Compliance required
- 151.09 Abrogation and greater restrictions
- 151.10 Interpretation
- 151.11 Warning and disclaimer of liability

Permits

- 151.25 Development permit
- 151.26 Application

Flood Hazard Reduction

- 151.35 General standards
- 151.36 Specific standards
- 151.37 Floodways

Administration and Enforcement

- 151.45 City Building Inspector; duties
- 151.46 Appeals and requests for variances

FEMA Floodplain Management

151.50 Enforcing agency

151.51 Code appendix adopted

151.52 Designation of flood prone hazard areas

151.53 Application process

Violations

151.99 Violations; penalty

GENERAL PROVISIONS

§ 151.01 STATUTORY AUTHORIZATION.

The Legislature of the state has in the Michigan Flood Plain Act, M.C.L.A §§ 117.1 et seq. delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, the City Council does ordain this chapter.

(Ord. 51, passed 2-8-78)

§ 151.02 FINDINGS OF FACT.

(A) The flood hazard areas of the city are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

(B) These flood losses are caused by the cumulative effect of obstructions in areas of special flood hazards which increase flood heights and velocities, and when inadequately anchored, damage uses in other areas. Uses that are inadequately floodproofed, elevated or otherwise protected from flood damage also contribute to the flood loss.

(Ord. 51, passed 2-8-78)

§ 151.03 PURPOSE.

It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed:

(A) to protect human life and health;

(B) to minimize expenditure of public money for costly flood control projects;

(C) to minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;

(D) to minimize prolonged business interruptions;

(E) to minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in areas of special flood hazard;

(F) to help maintain a stable tax base by providing for the second use and development of areas of special flood hazard so as to minimize future flood blight areas;

(G) to insure that potential buyers are notified that property is in an area of special flood hazard; and,

(H) to insure that those who occupy the areas of special flood hazard assume responsibility for their actions.

(Ord. 51, passed 2-8-78)

§ 151.04 METHODS OF REDUCING FLOOD LOSSES.

In order to accomplish its purposes, this chapter includes methods and provisions for:

(A) restricting or prohibiting uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;

(B) requiring that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

(C) controlling the alteration of natural flood plains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;

(D) controlling filling, grading, dredging, and other development which may increase flood damage; and,

(E) preventing or regulating the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards in other areas.

(Ord. 51, passed 2-8-78)

§ 151.05 DEFINITIONS.

For the purpose of this chapter, the following definitions shall apply unless the context clearly indicates or requires a different meaning.

APPEAL. A request for a review of the City Building Inspector's interpretation of any provision of this chapter or a request for a variance.

AREA OF SHALLOW FLOODING. A designated AO or VO Zone on the Flood Insurance Rate Map (FIRM). The base flood depths range from one to three feet; a clearly defined channel does not exist; the path of flooding is unpredictable and indeterminate; and, velocity flow may be evident.

AREA OF SPECIAL FLOOD HAZARD. The land in the flood plain within a community subject to a one per cent or greater chance of flooding in any given year.

BASE FLOOD. The flood having a one percent chance of being equalled or exceeded in any given year.

DEVELOPMENT. Any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations located within the area of special flood hazard.

EXISTING MOBILE HOME PARK OR MOBILE HOME SUBDIVISION. A parcel (or contiguous parcels) of land divided into two or more mobile home lots for rent or sale for which the construction of facilities for servicing the lot on which the mobile home is to be affixed (including, at a minimum, the installation of utilities, either final site grading or the pouring of concrete pads, and the construction of streets) is completed before the effective date of this chapter.

EXPANSION TO AN EXISTING MOBILE HOME PARK OR MOBILE HOME SUBDIVISION. The preparation of additional sites by the construction of facilities for servicing the lots on which the mobile homes are to be affixed (including, at a minimum, the installation of utilities, either final site grading or the pouring of concrete pads, or the construction of streets).

FLOOD or FLOODING. A general and temporary condition of partial or complete inundation of normally dry land areas from:

- (1) the overflow of inland or tidal waters; and/or
- (2) the unusual and rapid accumulation or runoff of surface waters from any source.

FLOOD INSURANCE RATE MAP (FIRM). The official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

FLOOD INSURANCE STUDY. The official report provided by the Federal Insurance Administration that includes flood profiles, the Flood Boundary-Floodway Map, and the water surface elevation of the base flood.

FLOODWAY. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than 584 feet above sea level.

HABITABLE FLOOR. Any floor usable for living purposes, which includes working, sleeping, eating, cooking or recreation, or a combination thereof. A floor used only for storage purposes is not a HABITABLE FLOOR.

MOBILE HOME. A structure that is transportable in one or more sections, built on a permanent chassis, and designed to be used with or without a permanent foundation when connected to the required utilities. It does not include recreational vehicles or travel trailers.

NEW CONSTRUCTION. Structures for which the “start of construction” commenced on or after the effective date of this chapter.

NEW MOBILE HOME PARK OR MOBILE HOME SUBDIVISION. A parcel (or contiguous parcels) of land divided into two or more mobile home lots for rent or sale for which the construction of facilities for servicing the lot (including, at a minimum, the installation of utilities, either final site grading or the pouring of concrete pads, and the construction of streets) is completed on or after the effective date of this chapter.

START OF CONSTRUCTION. The first placement of permanent construction of a structure (other than a mobile home) on a site, such as the pouring of slabs or footings or any work beyond the stage of excavation. Permanent construction does not include land preparation, such as clearing, grading, and filling, nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not as part of the main structure. For a structure (other than a mobile home) without a basement or poured footings, the START OF CONSTRUCTION includes the first permanent framing or assembly of the structure or any part thereof on its piling or foundation. For mobile homes not within a mobile home park or mobile home subdivision, START OF CONSTRUCTION means the affixing of the mobile home to its permanent site. For mobile homes within mobile home parks or mobile home subdivisions, START OF CONSTRUCTION is the date on which the construction of facilities for servicing the site on which the mobile home is to be affixed (including, at a minimum, the construction of streets, either final site grading or the pouring of concrete pads, and installation of utilities) is completed.

STRUCTURE. A walled and roofed building or mobile home that is principally above ground.

SUBSTANTIAL IMPROVEMENT.

(1) Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 per cent of the market value of the structure either: before the improvement or repair is started, or if the structure has been damaged and is being restored, before the damage occurred.

(2) For the purposes of this definition SUBSTANTIAL IMPROVEMENT is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure.

(3) The term does not, however, include either:

(a) any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions, or

(b) any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

VARIANCE. A grant of relief from the requirements of this chapter which permits construction in a manner that would otherwise be prohibited by this chapter.

(Ord. 51, passed 2-8-78)

§ 151.06 APPLICABILITY OF PROVISIONS.

This chapter shall apply to all areas of special flood hazards within the jurisdiction of the city.

(Ord. 51, passed 2-8-78)

§ 151.07 BASIS FOR ESTABLISHING AREAS OF SPECIAL FLOOD HAZARD.

The areas of special flood hazard identified by the Federal Insurance Administration in a scientific and engineering report entitled "The Flood Insurance Study for the City of Ferrysburg, Michigan, Ottawa County," dated August 1977, with accompanying Flood Insurance Rate Maps and Flood Boundary-Floodway Maps, is hereby adopted by reference and declared to be a part of this chapter. The Flood Insurance Study is on file at the City Hall, 408 5th Street, Ferrysburg, Michigan 49409.

(Ord. 51, passed 2-8-78)

§ 151.08 COMPLIANCE REQUIRED.

No structure or land shall hereafter be constructed, located, extended, converted or altered without full compliance with the terms of this chapter and other applicable regulations.

(Ord. 51, passed 2-8-78)

§ 151.09 ABROGATION AND GREATER RESTRICTIONS.

This chapter is not intended to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this chapter and another ordinance, easement, covenant, or deed restriction conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

(Ord. 51, passed 2-8-78)

§ 151.10 INTERPRETATION.

In the interpretation and application of this chapter, all provisions shall be:

(A) considered as minimum requirements;

- (B) liberally construed in favor of the governing body; and,
- (C) deemed neither to limit nor repeal any other powers granted under state statutes.

(Ord. 51, passed 2-8-78)

§ 151.11 WARNING AND DISCLAIMER OF LIABILITY.

The degree of flood protection required by this chapter is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by manmade or natural causes. This chapter does not imply that land outside the areas of special flood hazards or uses permitted within such areas will be free from flooding or flood damages. This chapter shall not create liability on the part of the city, any officer or employee thereof, or the Federal Insurance Administration for any flood damages that result from reliance on this chapter or any administrative decision lawfully made thereunder.

(Ord. 51, passed 2-8-78)

PERMITS

§ 151.25 DEVELOPMENT PERMIT.

A development permit shall be obtained before construction or development begins within any area of special flood hazard established in § 151.07.

(Ord. 51, passed 2-8-78) Penalty, see § 151.99

§ 151.26 APPLICATION.

Application for a development permit may include, but not be limited to: plans in duplicate drawn to scale showing the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities; and the location of the foregoing. Specifically, the following information is required:

- (A) elevation in relation to mean sea level of the lowest floor (including basement) of all structures;
- (B) elevation in relation to mean sea level to which any structure has been floodproofed;
- (C) certification by a registered professional engineer or architect that the floodproofing methods for any nonresidential structure meet the floodproofing criteria in § 152.36(B); and,
- (D) description of the extent to which any watercourse will be altered or relocated as a result of proposed development.

(Ord. 51, passed 2-8-78)

FLOOD HAZARD REDUCTION

§ 151.35 GENERAL STANDARDS.

In all areas of special flood hazards the following standards are required:

(A) Anchoring.

(1) All new construction and substantial improvements shall be anchored to prevent flotation, collapse or lateral movement of the structure.

(2) All mobile homes shall be anchored to resist flotation, collapse, or lateral movement by providing over-the-top and frame ties to ground anchors. Specific requirements shall be that:

(a) over-the-top ties be provided at each of the four corners of the mobile home, with two additional ties per side at intermediate locations, with mobile homes less than 50 feet long requiring one additional tie per side;

(b) frame ties be provided at each corner of the home with five additional ties per side at intermediate points, with mobile homes less than 50 feet long requiring four additional ties per side;

(c) all components of the anchoring system be capable of carrying a force of 4,800 pounds; and,

(d) any additions to the mobile home be similarly anchored.

(B) Construction materials and methods.

(1) All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.

(2) All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.

(C) Utilities.

(1) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system.

(2) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharge from the systems into flood waters.

(3) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

(D) Subdivision proposals.

(1) All subdivision proposals shall be consistent with the need to minimize flood damage.

(2) All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical, and water systems located and constructed to minimize flood damage.

(3) All subdivision proposals shall have adequate drainage provided to reduce exposure to flood damage.

(4) Base flood elevation data shall be provided for subdivision proposals and other proposed development which contain at least 50 lots or 5 acres (whichever is less).

(Ord. 51, passed 2-8-78) Penalty, see § 151.99

§ 151.36 SPECIFIC STANDARDS.

In all areas of special flood hazards where base flood elevation data has been provided as set forth in § 151.07 or § 151.45(B)(2), the following provisions are required:

(A) Residential construction. New construction and substantial improvement of any residential structure shall have the lowest floor, including basement, elevated to or above base flood elevation.

(B) Nonresidential construction. New construction and substantial improvement of any commercial, industrial or other nonresidential structure shall either have the lowest floor, including basement, elevated to the level of the base flood elevation; or, together with attendant utility and sanitary facilities, shall:

(1) be floodproofed so that below the base flood level the structure is watertight with walls substantially impermeable to the passage of water;

(2) have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and

(3) be certified by a registered professional engineer or architect that the standards of this subsection are satisfied (Such certifications shall be provided to the official as set forth in § 151.45(C)(2)).

(C) Mobile homes.

(1) Mobile homes shall be anchored in accordance with § 151.35(A)(2).

(2) For new mobile home parks and mobile home subdivisions; for expansions to existing mobile home parks and mobile home subdivisions; for existing mobile home parks and mobile home subdivisions where the repair, reconstruction or improvement of the streets, utilities and pads equals or exceeds 50 per cent of the value of the streets, utilities and pads before the repair,

reconstruction or improvement has commenced; and for mobile homes not placed in a mobile home park or mobile home subdivision, it is required that:

- (a) stands or lots are elevated on compacted fill or on pilings so that the lowest floor of the mobile home will be at or above the base flood level;
- (b) adequate surface drainage and access for a hauler are provided; and,
- (c) in the instance of elevation on pilings, that:
 - 1. lots are large enough to permit steps;
 - 2. piling foundations are placed in stable soil no more than ten feet apart; and
 - 3. reinforcement is provided for pilings more than six feet above the ground level.

(3) No mobile home shall be placed in a floodway, except in an existing mobile home park or existing mobile home subdivision.

(Ord. 51, passed 2-8-78) Penalty, see § 151.99

§ 151.37 FLOODWAYS.

For locations within areas of special flood hazard established in § 151.07 or areas designated as floodways, since the floodway is an extremely hazardous area due to the velocity of flood waters which carry debris, potential projectiles, and erosion potential, the following provisions apply:

(A) Encroachments, including fill, new construction, substantial improvements, and other development, are prohibited unless certification by a registered professional engineer or architect is provided demonstrating that encroachments shall not result in any increase in flood levels during the occurrence of the base flood discharge.

(B) If subsection (A) is satisfied, all new construction and substantial improvements shall comply with all applicable flood hazard reduction provisions of this subchapter.

(C) The placement of any mobile homes is prohibited, except in an existing mobile home park or existing mobile home subdivision.

(Ord. 51, passed 2-8-78) Penalty, see § 151.99

ADMINISTRATION AND ENFORCEMENT

§ 151.45 CITY BUILDING INSPECTOR; DUTIES.

(A) Designation of City Building Inspector. The City Building Inspector is hereby appointed to administer and implement this chapter by granting or denying development permit applications in accordance with its provisions.

(B) Duties and responsibilities of City Building Inspector. Duties of the City Building Inspector shall include, but not be limited to, the following:

(1) Permit review. The city Building Inspector shall:

(a) review all development permits to determine that the permit requirements of this chapter have been satisfied;

(b) review all development permits to determine that all necessary permits have been obtained from those federal, state or local governmental agencies from which prior approval is required;

(c) review all development permits to determine if the proposed development adversely affects the carrying capacity of the area of special flood hazard. For purposes of this chapter, ADVERSELY AFFECTS means that the cumulative effect of the proposed development when combined with all other existing and anticipated development will not increase the water surface elevation of the base flood more than one foot at any point.

(2) Use of other base flood data. When base flood elevation data has not been provided in accordance with § 151.07, the City Building Inspector shall obtain, review, and reasonably utilize any base flood elevation data available from a federal, state or other source, in order to administer § 151.36(A) and (B).

(3) Information to be obtained and maintained. The City Building Inspector shall:

(a) obtain and record the actual elevation (in relation to mean sea level) of the lowest habitable floor (including basement) of all new or substantially improved structures;

(b) for all new or substantially improved floodproofed structures:

1. verify and record the actual elevation (in relation to mean sea level); and
2. maintain the floodproofing certifications required in § 151.26(C);

(c) maintain for public inspection all records pertaining to the provisions of this chapter.

(4) Alteration of watercourses. The city Building Inspector shall:

(a) notify adjacent communities and the Water Resources Commission, Bureau of Water Management, prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Insurance Administration;

(b) require that maintenance is provided within the altered or relocated portion of said watercourse so that the flood-carrying capacity is not diminished.

(5) Interpretation of FIRM boundaries. The city Building Inspector shall make interpretations, where needed, as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in § 151.46.

(Ord. 51, passed 2-8-78)

§ 151.46 APPEALS AND REQUESTS FOR VARIANCES.

(A) Generally.

(1) The Zoning Board of Appeals as established by the city shall hear and decide appeals and requests for variances from the requirements of this chapter.

(2) The Zoning Board of Appeals shall hear and decide appeals when it is alleged there is an error in any requirement, decision, or determination made by the City Building Inspector in the enforcement or administration of this chapter.

(3) Those aggrieved by the decision of the Zoning Board of Appeals, or any taxpayer, may appeal such decision to the Ottawa County Circuit Court.

(4) In passing upon such applications the Zoning Board of Appeals shall consider all technical evaluations, all relevant factors, standards specified in other sections of this chapter, and:

(a) the danger that materials may be swept onto other lands to the injury of others;

(b) the danger to life and property due to flooding;

(c) the susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;

(d) the importance of the services provided by the proposed facility to the community;

(e) the necessity to the facility of a waterfront location, where applicable;

(f) the availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;

(g) the compatibility of the proposed use with existing and anticipated development;

(h) the relationship of the proposed use to the comprehensive plan and flood plain management program for that area;

(i) the safety of access to the property in times of flood for ordinary and emergency vehicles;

(j) the expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site; and

(k) the costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water systems, and streets and bridges.

(5) Generally, variances may be issued for new construction and substantial improvements to be erected on a lot of ½ acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing items (a)-(k) in subsection (A)(4) above have been fully considered; as lot size increases beyond ½ acre, the technical justification required for issuing the variance increases.

(6) Upon consideration of the factors of subsection (A)(4) and the purposes of this chapter, the Zoning Board of Appeals may attach such conditions to the granting of variances as it deems necessary to further the purposes of this chapter.

(7) The City Building Inspector shall maintain the records of all appeal actions and report any variances to the Federal Insurance Administration upon request.

(B) Conditions for variances.

(1) Variances may be issued for the reconstruction, rehabilitation or restoration of structures listed on the National Register of Historic Places or the State Inventory of Historic Places, without regard to the procedures set forth in the remainder of this section.

(2) Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.

(3) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(4) Variances shall only be issued upon:

(a) a showing of good and sufficient cause;

(b) a determination that failure to grant the variance would result in exceptional hardship to the applicant; and

(c) a determination that the granting of a variance will not:

1. result in increased flood heights, additional threats to public safety, or extraordinary public expense;
2. create nuisances;
3. cause fraud on or victimization of the public as identified in § 151.26(D)(4); or
4. conflict with existing local laws or ordinances.

(5) Any applicant to whom a variance is granted shall be given written notice that the structure will be permitted to be built with a lowest floor elevation below the base flood elevation and that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation.

(Ord. 51, passed 2-8-78)

FEMA FLOODPLAIN MANAGEMENT

§ 151.50 ENFORCING AGENCY.

Pursuant to the provisions of the State Construction Code, Act 230 of the Public Acts of 1972, as amended, being M.C.L.A. §§ 125.1501 et seq., the Building Inspector of the city is hereby designated as the enforcing agency to discharge the responsibility of the city under the State Construction Code within the corporate limits of the city.

(Ord. 272, passed 12-5-11)

§ 151.51 CODE APPENDIX ADOPTED.

Pursuant to the State Construction Code, Section 8b(6) of Act 230 of the Public Acts of 1972, as amended, being § 125.1508b(6), Appendix G of the Michigan Building Code shall be enforced by the city, through its enforcing agency within the corporate limited of the city.

(Ord. 272, passed 12-5-11)

§ 151.52 DESIGNATION OF FLOOD PRONE HAZARD AREAS.

The Federal Emergency Management Agency (FEMA) Flood Insurance Study (FIS) entitled "Ottawa County, Michigan (all jurisdictions)" and dated December 16, 2011, and the Flood Insurance Rate Maps (FIRMS) panel numbers 26139C, 0059E, 0076E, 0077E, 0078E, 0079E, and 0083E, dated December 16, 2011, are adopted for the purpose of administration of the State Construction Code, and declared to be part of Section 1612.3 of the State Building Code to provide the content of the "Flood Hazards" section of Table R301.2(1) of the State Building Code.

(Ord. 272, passed 12-5-11)

§ 151.53 APPLICATION PROCESS.

In the discretion of the Building Inspector, an applicant for a permit to construct improvements in or near a flood prone hazard area shall provide with the application a site plan certified by a licensed surveyor or professional engineer depicting the location of proposed improvements in relation to the flood hazard area and, if required by the Building Inspector, an as-built plan certifying that the improvements comply with the regulations of this chapter.

(Ord. 272, passed 12-5-11)

VIOLATIONS

§ 151.99 VIOLATIONS; PENALTY.

Violations of Chapter 151 are subject to the following penalties:

(A) Civil infraction. A violation of Chapter 151 shall be a civil infraction subject to a fine. Increased civil fines will be imposed for repeated violations that occur within a six-month period. The civil fine for a first offense is \$50. The civil fine for the first repeat offense is \$250. The civil fine for the second repeat offense is \$500. The City shall also be entitled to equitable relief to abate the violation and to such other relief as may be available to the city pursuant to Chapters 83 and 87 of the Michigan Revised Judicature Act, as amended, being M.C.L.A. §§ 600.8301 et seq. and 600.8701 et seq. Each day on which any violation of those sections occurs shall constitute a separate offense. Nothing in this section shall restrict other remedies available to the city.

(B) Nuisance. A violation of Chapter 151 is declared to be a nuisance per se.

(C) Enforcement. The City Manager and all police officers of the City are authorized to issue civil infractions citations pursuant to this chapter.

(Ord. 272, passed 12-5-11)
